Satisfaction guarantee: If you don't think it meets your expectations by lunchtime, you can simply leave and get 100% of the invoice amount back.

Workshop trainer: Manuel Matuzović | Frontend developer from Vienna

Manuel is specialized in HTML, accessibility, and CSS layout and architecture. Find him at [Mastodon](#).

Workshop topics & content

In this full-day workshop you take the first steps in automated and manual accessibility testing.

The goal: What can you expect from this workshop?

You learn about the most common testing tools, the difference between automatic and manual testing, how to use the keyboard to discover accessibility bugs, screen reader basics, and how to integrate accessibility testing in your day-to-day development workflow.

Target group: Web developers (front-end and back-end), UI designers and anyone who has at least a basic understanding of HTML and CSS.

Previous knowledge: At least HTML and CSS Basics.

Preparation development environment: none
